## **OUR PRODUCT – (SC74) NAPTH & C9 FUEL ADDITIVE**

### **DESCRIPTION :**

SC74 is an additive which increases the molecular weight of Naptha & C9 Fuels which is desired for reduction in volatility hence reduces the likelihood of vapor lock.

SC 74 also has oxygenated hydrocarbon & nitrates to improve the combustion quality considerably with reduction in soot & co in exhaust by @ 20% which indicates improved combustions. It increases the lubrication property of **C9** fuel.

### **Properties of SC74 Additives :**

- 1) Density @ 0.89 Ug/lit
- 2) Color – Opaque Dark Green
- 3) Proportion to be used 1:3000 in Napth / C9 Fuels
- 4) Flash Point @ 30°C
- 5) Velocity @ 20 Seconds in B4 Cup

Packaging Available : 1 ltr., 5 ltrs., 10 ltrs. Cans only

**Note :** Few adjustments in system are required after administration of the additive in the system they are to be made by consultation with us.

**For SUMA FINE CHEMICALS,**
